

Utbildning i

EBR Cable laying - KJ41:21.1

Om utbildningen

Do you work with underground cables, cable cabinets or poles belonging to electrical power grids in Sweden? Then you need by law a self-audit scheme and the right knowledge of rules, methods and working methods to be allowed to perform the work.

Training gives you the right to perform cable work and is based on the publication EBR Requirements for cable installation and KJ 41:21. The training includes a practical template for a self-audit scheme (value 1995 SEK!).

För vem?

For professionals who work with cable laying of various types, such as excavator operators, construction workers and truck drivers who handle cables in connection with cable unrolling.

Innehåll

- Relevant laws, regulations and ordinances.
- EBR requirements for competence.
- Work environment risks during cable laying (ESA Excavation near and near a high-voltage cable).
- Environmental aspects during cable excavation and cable work.
- Check completion before handover.
- Cable laying according to EBR report cable laying max 145 kV (KJ41).
- Self-audit.

Baserad på regelverk

- KJ 41:21.1

Längd

1 dag

Giltlighetstid

After completing the training, you will receive a certificate from the Swedish Energy Companies. The certificate is valid for 6 years.
The certificate is only valid in combination with a valid ESA certificate.

Förkunskaper

No special prior knowledge is required.

Övrigt

Carried out according to Energiföretagens requirement specification for Wattityd.
Max 16 participants.
A fee for certification fee and training materials of 495-995 SEK will be added from the Energiföretagen, depending on whether the participant has access to the publications previously or not.
The course ends with a digital final exam.
