

Utbildning i

EBR ESA Instructed person

EBR ESA Instructed Person is for you who will be performing non-electrical work in or adjacent to an electrical installation. Examples includes painting, cleaning, or casting base slabs in power line corridors.

Om utbildningen

Do you need to have access to e.g. grid stations, switchgear, operating room but are not skilled? Then this is the training for you. ESA Instructed person is aimed at you who work with maintenance such as mowing grass, repainting or fencing at an electrical installation or work alongside a skilled person but are not a skilled person yourself. The training covers safety hazards so that you can carry out the work in a safe manner.

För vem?

Suitable för all non-skilled workers who will perform a non-electrical work inside or close to electrical installations belonging to the power grid.
